Veterinary Sciences

College of  
Biological and

## Word from the Vice-Chancellor

I wish to warmly welcome you all who are interested in the programmes offered by the University of Nairobi. By the time you complete reading through the supplement for **January Admission**, I am sure you will have identified one or two programmes that will suit your academic and professional needs.

The University of Nairobi in its pursuit of world class excellence continues to contribute to national and regional development by offering training in high-level human resource development in specialized areas that are not catered for by any other institution of higher learning in the country. An innovative development in the University's education delivery and training has been the introduction of continuing education/module II programmes. In availing windows of opportunity to all in search of knowledge, the University has expanded its modes of delivery to include distance and e-learning. The University is also offering tailor made programmes that are demand/customer driven, in collaboration with partners, to suit the needs of our country as well as the region.

The University has established over 100 international academic links and exchange programmes that have placed the University at the cutting edge of knowledge. For example the Institute of Tropical and Infectious Diseases, an initiative between the University of Nairobi and the University of Manitoba. With the Alumni Association, we will continue to forge collaborations with other local and international institutions and the corporate world in order to optimise the impact of our programmes. Knowledge is power, and the University of Choice remains the University of Nairobi. To find out more and keep abreast with the latest developments at the University of Nairobi, you are invited to log onto our website: [www.uonbi.ac.ke](http://www.uonbi.ac.ke)

Professor George A. O. Magoha, IOM, EBS

Email: [deanagric@uonbi.ac.ke](mailto:deanagric@uonbi.ac.ke)
